

WOOORE PRIMARY & NURSERY SCHOOL

Maths Intent

At our school, we aim to develop confident, resilient and enthusiastic mathematicians who are able to apply their skills to everyday life. Through the use of the White Rose Education maths scheme and Mastering Number in EYFS, KS1 and KS2, we provide a progressive curriculum that builds fluency, reasoning and problem-solving skills for all learners. We believe that every child can succeed in mathematics through high-quality teaching, practical experiences and carefully sequenced learning.

We are committed to developing mathematical oracy through the use of Voice 21 strategies, encouraging children to explain their thinking, justify their answers and engage in meaningful mathematical discussion. By fostering confidence in speaking and listening, we enable pupils to deepen their understanding and become articulate, reflective learners who can communicate mathematically with clarity and confidence.
